

Restore Nebraska Conference to highlight Dr. Susan Center Restoration

The Dr. Susan La Flesche Picotte Memorial Hospital Restoration Project will be highlighted at this year's Restore Nebraska Conference.

The Conference is scheduled March 2 at Metropolitan Community College's Fort Omaha Campus in the Center for Advanced and Emerging Technology.

Dan Worth and Adam Sitzmann, both from BVH Architecture, will be on-hand to discuss the restoration of the historic hospital.

Worth is a member of the Board Advisory Committee member for the Dr. Susan La Flesche Picotte Memorial Hospital Restoration Project Board of Directors and is a principal/historical architect at BVH Architecture. Sitzmann is a Project Coordinator at BVH Architects, a role he serves with the restoration project.

The conference presentation provides an excellent opportunity to draw attention to the important work of Dr. Susan La Flesche Picotte and those endeavoring to restore her hospital. For more information on the conference or to purchase tickets, visit <https://www.restorationexchange.org/events/restore-nebraska-conference/>.
